

## TROPICAL CYCLONE BULLETIN NR. 30

### Super Typhoon NANDO (RAGASA)

Issued at 11:00 PM, 23 September 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

#### NANDO MAINTAINS ITS STRENGTH AS IT MOVES TOWARDS SOUTHERN CHINA.

##### Location of Center (10:00 PM)

The center of the eye of Super Typhoon NANDO was estimated based on all available data at **630 km West of Itbayat, Batanes (OUTSIDE PAR)** (**20.8°N, 115.8°E**).

##### Intensity

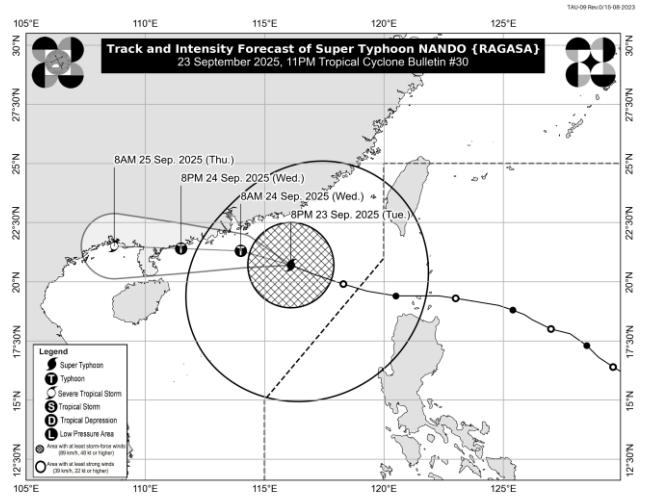

Maximum sustained winds of **185 km/h** near the center, gustiness of up to **230 km/h**, and central pressure of **925 hPa**

##### Present Movement

**West northwestward at 20 km/h**

##### Extent of Tropical Cyclone Winds

**Strong to typhoon-force winds** extend outwards up to **650 km** from the center

#### TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
<b>12-Hour Forecast</b> 8:00 AM 24 September 2025	21.3	114.0	815 km West of Extreme Northern Luzon (OUTSIDE PAR)	175	TY	WNW 20
<b>24-Hour Forecast</b> 8:00 PM 24 September 2025	21.4	111.5	1,075 km West of Extreme Northern Luzon (OUTSIDE PAR)	165	TY	W 20
<b>36-Hour Forecast</b> 8:00 AM 25 September 2025	21.5	108.7	1,365 km West of Extreme Northern Luzon (OUTSIDE PAR)	100	STS	W 25

#### TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

TCWS No.	Luzon	Visayas	Mindanao
<b>1</b> Wind threat: <b>Strong winds</b>	<p><b>Batanes, the northwestern portion of Cagayan (Pamplona, Claveria, Abulug, Sanchez-Mira, Santa Praxedes) including the western portion of Babuyan Islands (Panuitan Isl., Calayan Isl., Dalupiri Isl., Irao Isl., Mabaag Isl., Barit Isl., Fuga Isl.), the northern and central portions of Apayao (Kabugao, Pudtol, Luna, Santa Marcela, Calanasan, Flora), , Abra, Ilocos Norte, and the northern and central portions of Ilocos Sur (Gregorio del Pilar, Magsingal, San Esteban, Banayoyo, Burgos, City of Candon, Santa Lucia, Santiago, San Vicente, Santa Catalina, Lididda, Nagbukel, Sinait, Suyo, Sigay, San Ildefonso, Galimuyod, Quirino, City of Vigan, San Emilio, Cabugao, Caoayan, San Juan, Santa, Bantay, Santo Domingo, Tagudin, Santa Cruz, Santa Maria, Narvacan, Salcedo)</b></p> <p>Warning lead time: <b>36 hours</b>            Range of wind speeds: <b>39 to 61 km/h (Beaufort 6 to 7)</b>            Potential impacts of winds: <b>Minimal to minor threat to life and property</b></p>	-	-

## TROPICAL CYCLONE BULLETIN NR. 30

### Super Typhoon NANDO (RAGASA)

Issued at 11:00 PM, 23 September 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

Refer to Weather Advisory No. 18 issued at 11:00 PM today for the heavy rainfall outlook due to the Southwest Monsoon enhanced by NANDO.

##### Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

Owing to the large wind field of NANDO, all Wind Signals will likely be lifted tomorrow.

The Southwest Monsoon and possible Easterlies, both enhanced by NANDO and OPONG, will bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- Tonight and tomorrow (24 September): Most of Luzon, Western Visayas, Surigao del Norte, and Dinagat Islands.
- Thursday (25 September): Batanes, Babuyan Islands, Cagayan, Ilocos Norte, Palawan, Siquijor, Camiguin, Surigao del Norte, Dinagat Islands, Davao Oriental, Davao del Sur, and Davao Occidental.

## TROPICAL CYCLONE BULLETIN NR. 30

### Super Typhoon NANDO (RAGASA)

Issued at 11:00 PM, 23 September 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

#### HAZARDS AFFECTING COASTAL WATERS

**A Gale Warning is in effect over the northern and western seaboards of Northern Luzon.** Refer to Gale Warning No. 7 issued at 5:00 PM today.

##### 24-Hour Sea Condition Outlook

###### **Up to very rough seas over the following coastal waters:**

- **Up to 4.5 m:** The seaboards of Batanes, Babuyan Islands, Ilocos Norte, and Ilocos Sur.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

###### **Up to rough seas over the following coastal waters:**

- **Up to 4.0 m:** The seaboard of Zambales
- **Up to 3.5 m:** The eastern seaboard of mainland Cagayan; the western seaboard of Bataan; the seaboard of Lubang Island.
- **Up to 3.0 m:** The western seaboard of Occidental Mindoro, Batangas, and northern mainland Palawan; the seaboard of Isabela and Kalayaan Islands; the northern and western seaboards of Calamian Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

###### **Up to moderate seas over the following coastal waters:**

- **Up to 2.5 m:** The northern seaboard of mainland Cagayan; the remaining western seaboard of mainland Palawan.
- **Up to 2.0 m:** The southern seaboard of Bataan; the western seaboard of Cavite; the remaining seaboard of Palawan including Cuyo and Cagayancillo Islands
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

##### Coastal Inundation

**The threat of storm surge to any coastal area of the country has ceased.** Refer to Storm Surge Warning No. 14 (Final) issued at 2:00 PM today for the details.

#### TRACK AND INTENSITY OUTLOOK

- NANDO is forecast to move generally west northwestward over the West Philippine Sea in the next 12 hours before turning more westward over the waters south of mainland China. It may make landfall over southern China tomorrow evening or on Thursday (25 September) early morning.
- NANDO will likely maintain its strength within the next 12 hours before beginning to weaken due to marginally favorable environment over the waters south of mainland China and the increasing frictional effects due to proximity to land. Further weakening is expected post landfall tomorrow evening.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
